Administrative Fellows Applications Available

Applications to participate in the 1985-86 Administrative Fellows Program are being sought throughout CSU campuses. Information and forms are available in the Academic Personnel Office, AD 109. Deadline for sub-

mission of applications is March 13.

The Administrative Fellows program is open to academic and administrative personnel who have tenured/permanent or probationary positions on their campuses and who desire to prepare for a career option in administration or management.

"The ideal candidate will have the temperament, talent and capability to handle administrative affairs," said Dr. J. C. Robinson (Academic Personnel).

The program is designed to provide an opportunity for upward mobility and is especially aimed at ensuring that women and persons from ethnic minority backgrounds are given equal opportunities for career development possibly leading to placement and advancement in administrative, managerial and executive positions in the CSU. Final selection of fellows and operation of the program will be on a nondiscriminatory basis.

The Fellows normally are assigned to a campus other than their own. Assignments at the home campus are possible when relocation would impose an undue personal hardship and when the experience would be clearly enhanced by remaining at the original campus.

Offers of appointment will be made by Chancellor Ann Reynolds on May 15.

The current Fellow from the San Bernardino campus is Dr. Carolyn Kubiak (Education) who is assigned to the Fullerton campus.

Information about eligibility or procedures is available from Dr. Arlo Harris (Chemistry), committee chair; and the committee members: Dr. Margaret Doane (English), Ann Marie Hearn (Accounting and Finance), Dr. Lee Porter (Extended Education), Dr. Ed Teyber (Psychology), Dr. J. C. Robinson (Academic Personnel), Helga Lingren (Student Union), David Swedlowe (Associated Students).

"He contributed greatly to the development of the department and will be missed by his many friends in the School of Natural Sciences," said Dr. James D. Crum, school dean.

In addition to his teaching responsibilities, Dr. Dennemeyer authored a widely used textbook, Introduction to Partial Differential Equations and Boundary Value Problems, which was one of the first on the subject available for undergraduate students.

He had earned his Ph.D. in mathematics from UCLA and taught at California State University, Long Beach for seven years. He served in the Air Force in the South Pacific during World War II.

Dr. Scherba Heads Desert Consortium

Dr. Gerald Scherba, professor of biology, is the new director of the Desert Studies Consortium, which operates the Desert Studies Center at Soda Springs northeast of Barstow.

He will be dividing his time between the consortium office, which is on the Cal State, Fullerton campus; the center at Soda Springs, sometimes called Zzyzx, and the San Bernardino campus, where he is teaching part-time in biology.

The consortium director is responsible for ensuring that the facility continues to be improved, for developing a curricular program and for encouraging the widest possible use of the center by CSU faculty and students.

At the center, located 13 miles southeast of Baker in the Mojave Desert, the CSU conducts desert studies, archaeological research and solar and wind energy projects.

The site features the original buildings of Zzyzx Mineral Springs, a health resort built in 1944 by evangelist Curtis Springer, as well as the rare and endangered Mojave chub fish and the desert pupfish.

The consortium, organized in 1976, consists of seven southern campuses of the CSU and the Bureau of Land Management. The property is owned by the federal government. The San Bernardino campus provided the initial director, a part-time position, and was responsible for much of the first renovation of the badly deteriorating buildings. The center now has running water, rest rooms, a new kitchen area and clean, repainted buildings which house sleeping rooms and lecture halls.

Phone Directories Now Are Available

Phone directories for the current year are being distributed by the Public Affairs Office to all official campus telephones. The directories are not to be used for off-campus business.

Departments not receiving sufficient copies for faculty and staff telephones should notify Public Affairs, Ext. 7558. Changes which have occurred since the copy was prepared for the printer should also be submitted in writing so that an addendum can be issued in about a month.

In addition to campus telephone numbers, the directory contains instructions from the Accounting Office and the areas within Procurement and Support Services for the preparation of various campus forms. This information, on Pages 86-90, was updated by the respective offices. Campus emergency procedures--covering fire, explosion, earthquake or medical emergencies--are summarized on the inside front cover of the publication.
